MTA Baisley Park Bus Depot Renovations & Upgrade

Under an MTA Bus Company Task Order, AG is prepared a facility condition survey report and completed MEP design of the entire facility. The report consisted of inspection findings and recommendations with the estimated cost of the proposed renovation work. The project design included a complete set of construction documents including plans, specifications, and Engineer's estimate for the design for a complete roofing system, new ventilation system including but not limited to exhaust and supply air, heating elements and controls. All electrical work related to the HVAC system is a part of this task order and shall be terminated into a dedicated panel. AG also provided sizing of a new gas service. AG provided support during pre-construction and construction phases including but not limited to responding to written inquiries from prospective bidders, preparing all Addenda to the construction documents, if changes are required prior to Opening Bid Date, participating in the Pre-Bid Site Tour; review and approve shop drawings, catalog cuts, O&M manuals respond to RFI's, and resolve any field condition that required Designer's input.
