

## NYCDOC Special Inspection Central Admission intake at West Facility Rikers Island

The west facility is located in the northwest part of the Rikers Island. There were five new sprungs added to this facility. Fletcher Thompson was the Architect and owners representative of record for this project. AG consulting Engineering, PC had a contract with Fletcher Thompson to perform Special Inspection Services for this project. We were contractually obligated to perform special inspections of masonry, mechanical system, structural safety/stability, fire stop, draft stop, fire block systems, footing, foundation, heating, concrete cast in place, insulation with R Valves, HVAC, water heat system with control, dust plannum with accessories, duck leakage testing, exist signs, lighting with controls, power distribution system, fire alarm and sprinkler systems.

AG's scope of work included performing special inspections of all the items mentioned above as per NYC Building Code Confirming Chapter 17. All the TR forms of NYCDOB were initiates and signed off by AG's professional engineer.
