

## **NYCHA Construction Management and Controlled Inspection work at Vladeck Housing Development**

The development is located in the southeast part of Manhattan and bounded by Madison Street on north, Jackson Street on the east, Water Street on the south and Governors Street on the west. There are twenty, six storied buildings on thirteen acres tract with 1510 apartments. The entire development with parking lots yard area, underground utilities, building façade, roofing, interior and exterior of the building with mechanical and electrical repair work including construction of new elevator mechanic room were in the construction contract.

AG Consulting Engineering provided engineers for this project who were responsible for routine construction management work including controlled inspection work of concrete cast-in-place, concrete mix design, preparation of concrete test cylinder, concrete field tests including slump, air entrant, temperature of concrete and for masonry mortar and grout testing. We also initiated and signed off all the related TR forms of NYCDOB.
