

NYCHA Elevator Modernization Project at Chelsea Houses

AG is providing mechanical and electrical design for the complete rehabilitation of existing eight (8) elevators including elevator car, elevator doors, shaft doors, machines, motors, sheaves, switches, controls, signals, ropes, cables, guards, safety devices, supports, sills and guide rails. The Chelsea Houses consists of two (2) 21 story residential buildings located on 1.93 acres situated between West 26th Street on the north, West 25th Street to the south, and Ninth Avenue to the east. Each building contains four (4) residential elevators, totaling eight (8) elevators and one hundred and twenty (120) openings. This vertical transportation system was last rehabilitated in 1995. We will also be assisting construction administration services throughout the project to ensure compliance with design intent and contract documentation.

Services

- Surveys
- Reports
- Meetings
- Calculations
- Equipment Selection
- Analysis
- Estimates
- Schedules
- Design Development - Drawing & Specifications
- Construction Administration
