

NYCHA Elevator Modernization Project at Drew Hamilton Houses

AG is providing mechanical and electrical design for the complete rehabilitation of existing twenty (20) elevators including elevator car, elevator doors, shaft doors, machines, motors, sheaves, switches, controls, signals, ropes, cables, guards, safety devices, supports, sills and guide rails. The Drew Hamilton Houses consists of five (5) 22 story residential buildings located on 7.17 acres situated between West 141st Street on the south, Eight Avenue to the west, and Seventh Avenue to the east. Each building contains four (4) residential elevators, totaling twenty (20) elevators and two hundred and sixty (260) openings. This vertical transportation system was last rehabilitated in 1995. We will also be assisting construction administration services throughout the project to ensure compliance with design intent and contract documentation.

Services

- Surveys
- Reports
- Meetings
- Calculations
- Equipment Selection
- Analysis
- Estimates
- Schedules
- Design Development - Drawing & Specifications
- Construction Administration
