

NYCSCA Intermediate School 116X Renovations

Located in Bronx, NY AG's work included feasibility report and design for facility wide toilet renovations.

First Floor Staff Toilets: Conversion to ADA compliant. This involved disconnection, removal and reinstallation of all toilet fixtures and water closets, and included modification/addition of the cold water/hot water/sanitary/vents piping. Existing doors were replaced with wider doors and the configuration of the water closet changed to different walls. This will required new lighting and switched for lighting and exhaust.

Third Floor Staff Toilets: Existing women's toilet was converted to men's toilet. All existing toilets fixtures were replaced with new, including new urinal fixture. Existing door was replaced with wider door. Existing men's room was converted to women's toilet by widening the room. This entailed demolition of existing wall and providing new wall into the adjoining room. All existing fixtures were replaced with new and provided new lighting in the toilet and adjoining room.

First Floor Student Toilets: New ADA approved toilet fixtures. The boy's room toilet widened. The chase moved into the existing storage room. Designed new water, sanitary and vent piping, and new lighting in both the boy's and girl's room and adjacent medicine office.

Third Floor and Student Toilets: Partial replacement of toilet fixtures. Storage rooms were shrunk to accommodate ADA toilet fixtures. HVAC ducts were modified for new walls and also involved new lighting, mechanical work in addition to plumbing.
