

NYCSCA Tottenville High School

Tottenville High School, designed in 1936 and located at 100 Luten Avenue, in Huguenot, Staten Island, New York is a large high school with over 3,000 students.

AG, as a Prime Engineering Consultant to SCA, was tasked to scope and upgrade the entire school's Electrical Distribution System by designing a new Electrical Distribution System including new Electrical Switchboard, Service Switch, Grounding System and Panel Boards. In addition, AG designed needed branch circuitry to accommodate extra electrical loads such as general purpose receptacles and AC receptacles for every classroom. After the preparation of Construction Documents for the Electrical Upgrade project and final award, AG currently supervises and supports the engineering efforts to complete the Construction Phase of the project.

Location:

Staten Island, NY

Owner:

NYCSCA

Services Provided:

Electrical
