

SUNY Stony Brook University Design Services for West Apartments, Building J

Stony Brook University is seeking basic design services for a new facility, termed Building J, to be located in the West Apartment complex on the campus. Stony Brook University's West Apartments currently consist of nine residence halls. The proposed Building J is intended to replicate the design, style, layout, amenities and finishes of the existing residence halls in that cluster.

The four-story residence facility will accommodate approximately 176 beds, in 30 apartments with four single bedrooms per apartment, a kitchen, two (2) bathrooms and a common suite living / dining area. The facility will also provide the code required ADA accessible units. The residence facility will also include commons facilities such as: mail distribution facilities, laundry facilities located conveniently; one telecommunications closet on each floor; and mechanical, telephone/data and electric service rooms appropriate to the needs of the facility.

The building will be designed according to the New York State Building Code, current edition plus all other applicable national and state codes. It must meet or exceed the requirements of the NYS Energy Code, and applicable executive orders, and will be certified for LEED Silver status as a minimum.

AG, as a subconsultant to Goshow Architects, is provided HVAC, Electrical Power, Power for Lighting, Plumbing, Sprinkler, Fire Alarm Systems design services related to the above project. Additionally, AG's scope included the design of empty raceways for the Communications/Telephone System and Security System.
