

## MTA Baisley Park Bus Depot Renovations & Upgrade

Mechanical, Electrical, Plumbing Design under Task Order Contract

Performing under a task order contract, AG performed an existing conditions survey and full MEP design for the facility-wide renovation. AG was present through the entire design phase, and delivered a full CD set, inclusive of specifications, and additional needs revealed during the engineer's estimate for roofing upgrades.

During pre-construction, AG was on-hand to aid with responses to written inquiries from prospective bidders, oversee preparation of addenda to construction documents, and participate in the pre-bid site Tour. During construction, AG aided various stakeholders by reviewing and approving shop drawings, catalog cuts, O&M manuals, RFI responses, and resolution of any field conditions which were appropriate for a designer to address.

**Location:**  
Queens, NY

**Owner:**  
MTA Bus Company

**Completion Date:**  
2014

**Services Provided:**  
Mechanical  
Electrical  
Plumbing
