

MTA LIRR East Side Access Project

Design Services During Construction

AG provided architectural field services during construction for this \$11B project to bring LIRR service to Grand Central Station. The project includes an eight-track terminal station and eight miles of tunneling.

In the new concourse will be 25,000sf of retail space, boasting refined, robust finishes with a unitized system to facilitate maintenance. Finishes include terrazzo flooring, marble, and fritted glass to assist in intuitive way-finding.
