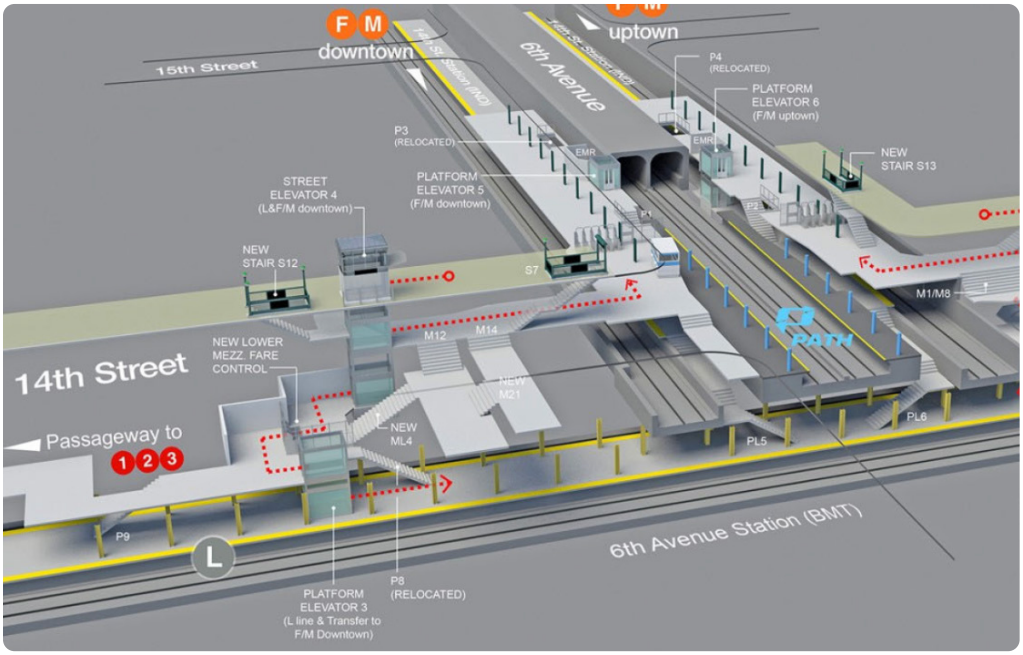
# NYCT 14th Street ADA Complex Design-Build

## ADA upgrades and SOGR work at four NYCT stations

The 14th Street ADA Complex is comprised of the Sixth Avenue Station (Canarsie Line), 14th Street Station (Sixth Avenue Line), 14th Street Station (Seventh Avenue Line), Eighth Avenue Station (Canarsie Line), and the Canarsie Line Tube from First to Eighth Avenues. The work consists of SOGR and ADA upgrades, including nine new elevators and ten new stairways. Each of the stations are connected by an existing passageway that allows a subway rider to access the L, 1/2/3, and F/M Lines without exiting the subway system.

AG is performing engineering for the MEP/FP systems throughout.



**Location:**
New York, NY

**Owner:**
New York City Transit

**Client:**
Citnalta-Forte JV

**Project Cost:**
$192mm

**Completion Date:**
Anticipated 2024

**Services Provided:**
Mechanical
Electrical
Plumbing
Fire Protection
