# NYCT Bowling Green Station

## MEP engineering for ADA refit

In order to provide handicap accessibility for the 100 year-old Bowling Green Station, AG was selected as part of a team of engineers and architects to provide MEP design work.

Bowling Green Station is located in Manhattan, just steps away from the historic U.S. Customs House, Battery Park and the NYCT offices at 2 Broadway. It is one of the 100 stations within the transit system that has been designated as a "Key Station," thus obligating conformance with ADA guidelines.

Work involved design elements including the installation of two new elevators, platform and control area improvements, new offices, and modifications to the electrical and mechanical systems. Working closely with the NYCT staff and other key stakeholders, AG developed the design which allowed construction to progress efficiently while maintaining high service availability.

**Location:**
New York, NY

**Owner:**
NYC Transit

**Client:**
DHK Architects

**Completion Date:**
2006

**Services Provided:**
Mechanical
Electrical
Plumbing
