Port Authority Bus Terminal

Design competition finalist

The Port Authority Bus Terminal design competition was a once-in-a-lifetime opportunity. The Port Authority held a competition amongst international design firms and there were a large number of teams who entered. AG was the sole MEP/FP consultant on a team of highly prestigious design specialist firms led by Arcadis.

AG contributed complete design services in alignment with Arcadis' vision of integrating building efficiency with sustainable design principles. The concept is a light-filled epicenter of urban life, featuring an elevated pedestrian plaza over Dyer Avenue, using only Port Authority–owned land--a remarkable achievement against the objective to link a new 7-train subway stop at Tenth Avenue and 41st Street.

The Arcadis submission was chosen as one of the five finalists in 2016.

Location:
New York, NY

Owner:
PANYNJ

Team Lead:
Arcadis

Services Provided:
Mechanical
Electrical
Plumbing
Fire Protection
